

# TEKZONEFORUM 062

MO. 29. Mai 2006, 17:00 UHR

**AJAX IN DER ANWENDUNG:  
DER MEISTER PROPER GEGEN HEUTIGE  
LIMITATIONEN VON WEB-APPLIKATIONEN?**

Ajax is not an acronym

## *WTF is AJAX/Ajax?*

- ➔ <http://en.wikipedia.org/wiki/AJAX>
- ➔ Asynchronous JavaScript and XML
- ➔ According to Garret Ajax is NOT an acronym
- ➔ Web-Application using browser-native technologies and open standards
- ➔ User Action is not necessarily tied to server communication (Asynchronous)

## *Pros and Cons*

- ➔ Pro: Everyone has a browser
- ➔ Pro: At least something is happening
- ➔ Con: Maintainability (e.g. zoo of widgets)
- ➔ Con: Scalability and Performance (e.g. BXE and Xopus)
- ➔ Con: No Desktop integration/No Offline functionality
- ➔ Con: The browser widget is a prison

## *Alternatives*

- ➔ XULRunner and Mono
- ➔ „XAML“ and .NET
- ➔ Applets (e.g. Canoo's UltralightClient)
